

The Distinguished Speaker Series

Department of Mathematics and Statistics

The digital age both empowers and challenges the ability of everyone to cope with a mounting volume of quantitative information and with the logic that underlies it. Are we equipped for the task? How must education change to ensure we will be?

Peter J.M. Nicholson is President and Chief Executive Officer, The Council of Canadian Academies and is a member of the Order of Canada.

Presented by

Peter J.M. Nicholson

Thursday, May 14, 2009

7:30 p.m. (Reception 9 p.m.)

Potter Auditorium, Rowe Building,
6100 University Avenue
