*Additive Properties of the Fibonacci Sequence*,  
Fibonacci Quart. **49** (2011), no. 1, 22–27

**Abstract**

In this note, we shall study some additive properties of the Fibonacci sequence  $F$ . In particular, we prove a lower and an upper bound for the quantity  $\sup_{A \subseteq \mathbb{N}} \{\bar{d}(A) : (A - A) \cap F = \emptyset\}$ .
